

Many New Homes Being Built In

## East El Paso

Unusual Building Activity On These Desirable Lots.

During the past few weeks work has begun on the erection of many homes and the remarkable feature about it is that a large percent of the homes are being built by people who are going to occupy them. This means what we have always said, that East El Paso is the place for a man who wants to own his own home.

One mile and a half closer to the city than some additions that are selling for the same money.

East El Paso lots have many other advantages over other additions whether you want to build a home or whether you want to make an investment. You have every convenience in East El Paso, good schools and churches besides.

The exterior of the bungalow is more than attractive while the interior is exceedingly conveniently arranged and is as pretty as the exterior. The building can be carried out as shown in the plans without a cost to exceed \$4000. A special outside feature is the rough mixed clinker brick and cobblestone work in porch walls and chimneys. There is a massive cobblestone fire place in the living room. These estimates are figured to include cost of plumbing and heating.

You don't expect to stay in El Paso any length of time—just a year or two and then “move on”—it doesn't make much difference where you live. But, if you are planning a permanent home—where you expect to live out your life and your children after you—
